TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, Kotlin, C#, C, C++, Verilog

Frameworks & Libraries: React.js, Keras

Tools & Platforms: GitHub, Figma, VirtualBox, Tomcat, Unity, EagleCAD

Databases: MongoDB, MySQL

EDUCATION

University of Central Florida

BS, Computer Engineering

Orlando, FL

May 2023

WORK EXPERIENCE

LocusUSA

Software Engineer

Melbourne, FL

09/05/2023 – 06/05/2025

- Developed and maintained front-end code for web and mobile applications using .NET MAUI, Flutter, React, and Python, which utilize TCP/IP connectivity for efficient data analysis.
- Programmed, integrated, and tested circuit boards for company projects, ensuring seamless hardware functionality and performance.
- Collaborated with designers and backend engineers to ensure seamless integration of UI and API functionalities.
- Designed responsive web and mobile application prototypes in Figma, translating user needs into interactive and user-friendly designs

Farm & Pet Superstore

Floor Manager

Orlando, FL

1/15/2019 – 9/30/2022

- Supervised and coordinated a team of up to 5 employees, ensuring optimal performance and adherence to organizational goals.
- Oversaw warehouse and delivery operations, streamlining workflows to enhance efficiency and accuracy.

PROJECTS

- **[OnlyHands](#):** Designed and developed a Tinder-like application for matching sparring partners in combat sports as part of a large Object-Oriented Programming project with a team of 9 members. Built both the website and app using the MERN stack (MongoDB, React.js, Node.js, Express.js) and contributed extensively to frontend design and the database using Figma, React.js, and MongoDB.
- **[Frequency-Based Instrumental Lights](#):** Collaborated with a team of four to research, design, and develop a product integrating frequency-based lighting effects for instruments. Authored a 120-page research paper on the project and led efforts in Python programming, product testing, development, and team management.
